

To whom it may concern,

My name is Pau Gama Pérez and I am a PhD student doing my thesis in the lab of Pablo M García-Rovés at University of Barcelona.

My work involves a comprehensive understanding of the physiopathology of obesity and type 2 diabetes and its reversibility by changes in lifestyle, focusing on their impact on the metabolic behavior and mitochondrial functionality in several tissues.

To address this aim we use state of the art technology in the field of mitochondrial physiology, and we intend to analyze and compare data collected according to defined standard procedures.

For this reason and through this letter, I express my willingness to be a member of MITOEAGLE Network, being interested in the following working groups:

- WG1. Standard operating procedures and user requirement document: Protocols, terminology, documentation
- WG3. MITOEAGLE data repository on fat tissues and other tissues
- WG4. MITOEAGLE data repository for blood cells and cultured cells

Thank you in advance for your consideration.
