## **O2k-Coaching Days 158<sup>th</sup> O2k-Workshop on high-resolution respirometry**

**2023 Feb 27 – Mar 01  
Innsbruck, Tyrol, Austria**

**O2k-Coaching Days** is a training course which provides a fundamental introduction to **high-resolution respirometry (HRR)** with the Oroboros O2k. It will give an overview of the **O2k**, including real-time analysis with **DatLab 8** and applications of the **Titration-Injection microPump TIP2k**. Hands-on sessions, using one O2k per participant, range from instrumental setup and service of the polarographic oxygen sensor (**OroboPOS**), instrumental quality control system, to respirometry experiments with substrate-uncoupler-inhibitor (SUIT) protocols using HEK 293T cells as the biological sample. Many optimized SUIT protocols are available as DL-Protocols and will be shown at the Coaching Days, as well as the [SUITbrowser](#), which helps you find the best SUIT protocol for your specific research questions. The [Blue Book](#) and [Mitochondrial Physiology](#) provide a basic introduction to mitochondrial

bioenergetics, complementing the training course, and therefore we recommend reading them beforehand. The 158<sup>th</sup> workshop is a unique opportunity to learn about the new developments in HRR.

## O2k-Workshop: OUR COMMON AIMS

- **Mitochondrial physiology:**  
Study mitochondrial function in the **context** of cell physiology and pathology
- **Instrumental performance – the O2k:**
  - 🕒 Learn **high**-resolution respirometry
  - 🕒 Gain **hands-on** experience
  - 🕒 Extend to O2k-**Multi**Sensor applications
- **Excellence in research:**
  - 🕒 Instrumental **quality** control
  - 🕒 Experimental design for **innovation**
  - 🕒 Data analysis meeting superior **standards**

Oroboros - as a driving force in mitochondrial physiology - extends the analytical and diagnostic power of high-resolution respirometry by integration of NADH- and Q-redox monitoring in the **NextGen-O2k**. We aim at establishing the Oroboros quality control management for dissemination to our worldwide O2k-Network laboratories. This will become an effective contribution to address the acute *reproducibility crisis* of scientific investigation. In the spirit of Open Science and global networking, we will enable data sharing across projects and institutions in an Open Access database on mitochondrial physiology and pathology, to resolve the *inflation crisis* and ultimately the *value-impact crisis* of present academic publication. This will support key developments in mitochondrial medicine. In addition, we expand our business to algal biotechnology and ecology with the NextGen-O2k PhotoBiology-Module, widening our focus from medicine to environment and climate.
